CURRENT WORLD MEMORY RECORDS

THEY SAID IT COULDN'T BE DONE

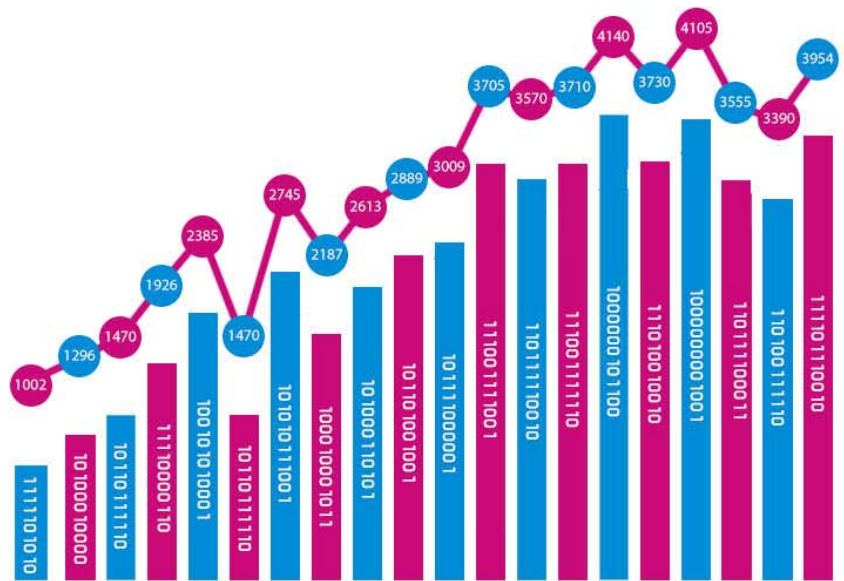

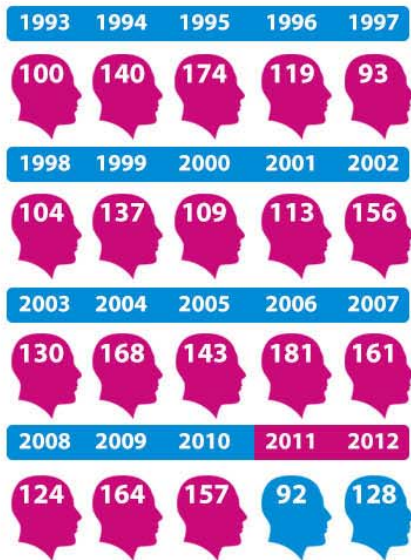

World Memory Championships

In 1993 London psychologists declared that no one could remember 20 digits spoken out loud at 2 second intervals. By 2000 a memory champion remembered 400, and in 2011 another champion recalled 300 numbers spoken at 1 second intervals – a perfect score. As the futurist Joel Barker said 'Those who say it cannot be done, should get out of the way of those who are doing it.'

Human potential is infinite - Remembering numbers spoken at every 2 seconds became so easy that the event had to be cut to 1 second intervals.

? Number of Names remembered in 15 minutes became easier as time went on. Format changed in 2011 to reflect the Global Village we live in.

Did you know ...

that the Arbiters will need to check around :-

3,500	Historical/Future Dates
6,000	Names
6,000	Spoken Numbers
9,000	Random Words
13,000	Abstract images
71,000	Individual Playing Cards
115,000	Random Numbers
125,000	Binary Numbers

That is over **450,000** items – and those are just the ones the competitors got right!

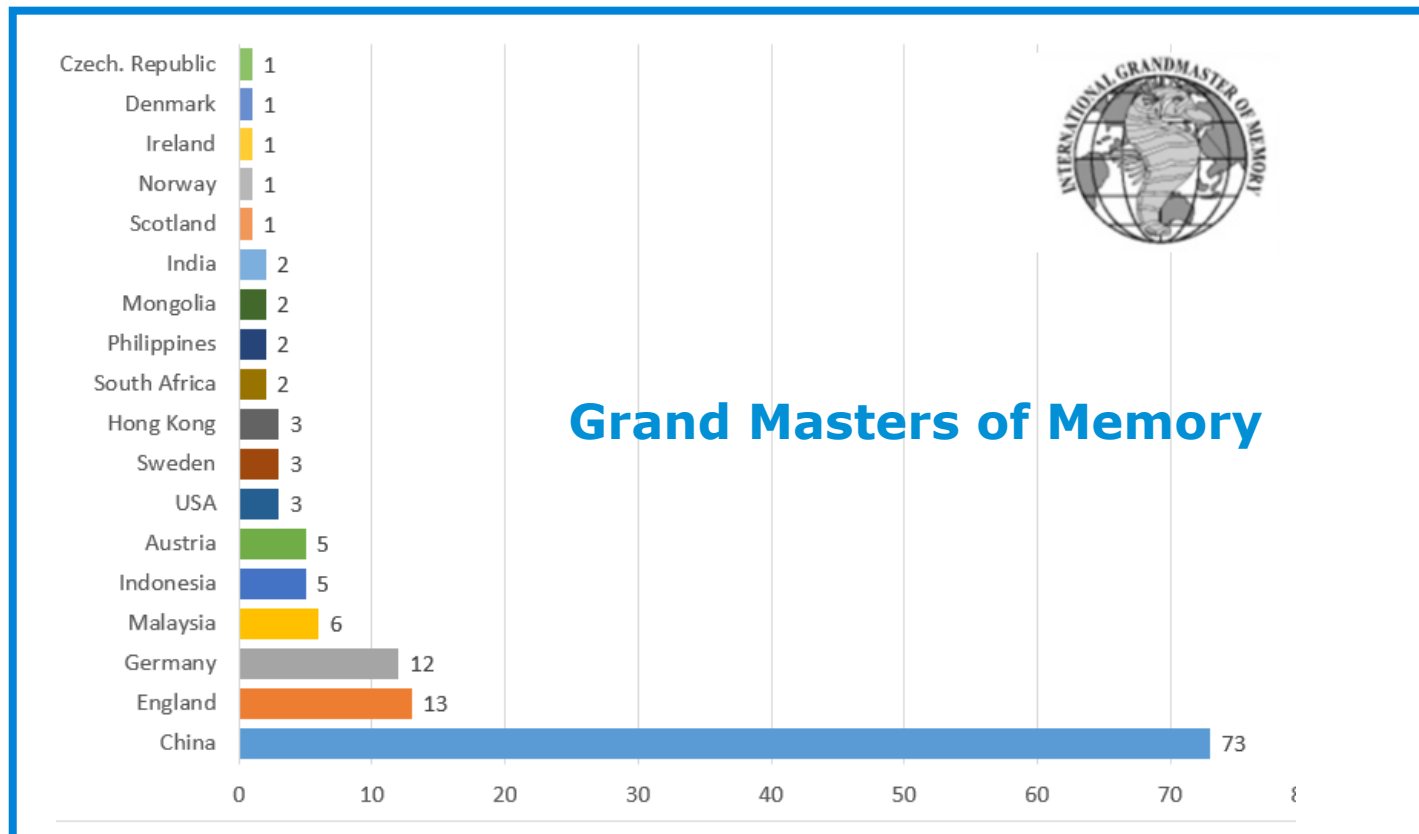

The results are then double checked – in all more than one Million pieces of data will be checked over three days.
